

FEBRUARY REPORT

Isatou Jallow & Ousman Ceesay

Fatou Janha, Binta Sillah, Ebrima Jallow, Fatoumata Darboe, Mariama Badjie, Adama Low, Kumba Bah, Oumie Jallow, Fatoumatta Singhateh, Mariama Kazeem, Mariama Bojang, Rohey Cham, Isatou Kombeh Njie, Muhammed Jaiteh

Person 1

01/02/2021: she is disturbed by both hypo and hyper, mostly she wakes up with hypo and sometimes at work place she always go into hypo. She also said since after HBA1c her machine isn't operating normally and the battery is 'new'

Person 2

13/02/2021: He uses Novorapid and Abasaglar but was misusing it by injecting the Abasaglar for mealtime and Novorapid for basal, everything is now discussed and he's been taught how to do it now.

Person 3

15/02/2021: A new member being added to the project, she is 17years old from Farato was diagnosed in 2019 and she using a mixtard insulin

Person 4

20/02/2021: Insulin intake is her problem; she always find it hard to inject herself, she injects mealtime insulin maximum 5 times a day and with all that she mostly has high levels. As time goes on, she will improve if much attention is given.

Person 5

20/02/2021: She have good levels and needs improvements alongside proper education especially the meal and insulin intake. The past 2 weeks she always has stomachache when the levels go high.

Person 6

28/02/2021: She test once daily with very high levels and she jumps 2 days without testing and its never encouraging. Her foot isn't doing good due to high levels and she really needs to be serious and put more effort, she also said that her problem is the insulin intake like she can't calculate to have the right value.
